

FOR IMMEDIATE RELEASE

October 1, 2007

CanScribe Career Centre - The Only Canadian Company Represented in the recent People to People Healthcare Delegation to China.

Lake Country, BC – CanScribe Career Centre's President and CEO Colleen Gaudet is proud to announce her successful participation in the People to People Ambassador Program's Healthcare Documentation and Data Capture Delegation in China from September 16 to 28, 2007, having visited Beijing, Guilin and Shanghai over the 22-day period.

CanScribe Career Centre, Canada's fully interactive on-line Medical Transcription School, was the only Canadian representative in the delegation led by Dr. Peter Perziosi, Executive Director of the Association for Healthcare Documentation Integrity (AHDl).

"It was an incredible honour and achievement to be invited to the international delegation with AHDl through the People to People Ambassador Program," says Colleen Gaudet, President and CEO with CanScribe Career Centre. "As well as presenting as part of our delegation in roundtable discussions, I was asked to lecture to Chinese students at the Capital Medical University, providing a brief overview of the Medical Transcription Industry in North America and discussing CanScribe's Medical Transcription Program in Canada."

As part of the Healthcare Documentation and Data Capture Delegation, Gaudet had the opportunity to meet with a number of prominent Chinese Counter Parts, including the:

- Department of Medical Record of Peking Union of Medical College Hospital
- Chinese Medical Record Association
- Information Department of the Hospital affiliated to Guilin Medical College
- Liutang Center Clinic
- Changhae Yueyang Hospital of Integrated Traditional Chinese and Western Medicine
- Shanghai Medical Exchange Centre

"The Delegation proved to be an educational and rewarding experience for all," explains Gaudet. "I engaged in highly focused, productive discourse with regards to how the Medical Transcription industry works in North American and how we can help our Chinese counterparts to successfully implement a Medical Transcription industry within their country. There may also be a great opportunity for CanScribe to help the Chinese develop an educational program to train qualified Medical Transcriptionists."

CanScribe Career Centre is a private educational institution located in Lake Country, British Columbia, whose internationally recognized Medical Transcription Course is available throughout Canada via on-line enrollment.

CanScribe remains the only Canadian school that has been approved by the Approval Committee for Certificate Programs (ACCP), a joint committee established by AHDl and the American Health Information Management Association (AHIMA), which certifies and approves medical transcription education programs. There are currently only 10 approved Medical Transcription programs in all of North America.
